DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 11 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Sibler (US 4,050,281). Sibler teach aligning an axis of the container directly to the axix of the stem. Note claim 1, lines 21-36.

In reference to claim 18, Sibler does not explicitly teach aligning the moving crosshead horizontally and vertically to an axis as defined by the main ram, however this would be inherent to the invention of Sibler. Note Figure 1.

Allowable Subject Matter

Claims 1-10 are allowed.

Claims 12-17, 19-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
